

Potable water valve cones

J.A Harrison are a renowned UK manufacturer, offering complete sealing solutions. Now available, valve packing cones along with other associated products for the Water Industry.

Method of sealing potable water rising stem valves where a conventional braided stuffing box packing has been previously used

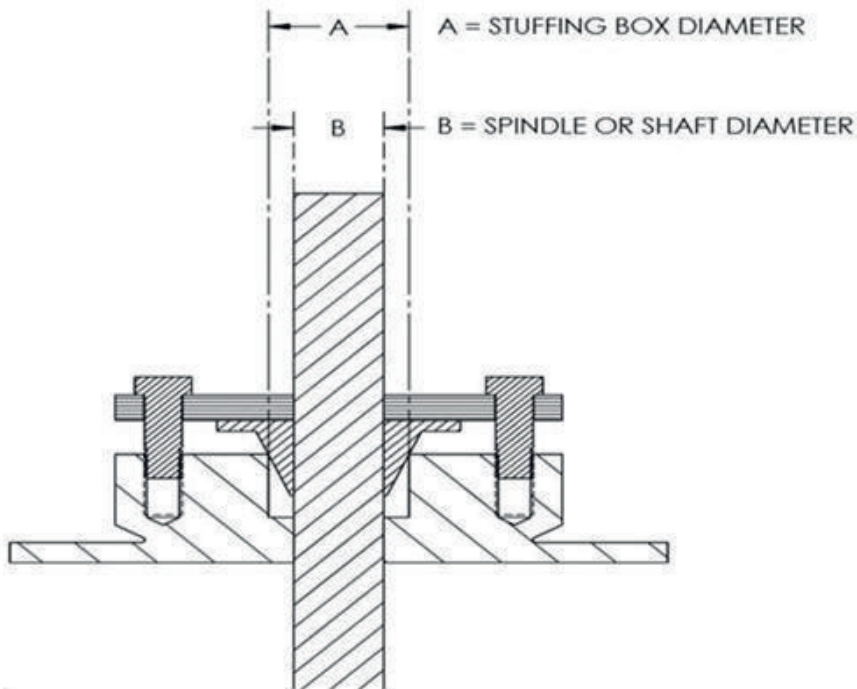

- EPDM rubber.
- WRAS approved for potable water
- Replaces the need for packing
- Extremely durable with long service life
- Not affected by high usage
- Dual sealing action against stem and gland follower
- Simply remove packing, insert correct sized cone, invert the gland follower and bolt down
- Extensively used by Water Authorities.
