

TESNIT® BA-60 has good thermal, mechanical and chemical properties, which makes it suitable for a wide range of applications. TASNIT® BA-60 is highly recommended with potable water supply and shipbuilding industries.

## PROPERTIES

## APPROPRIATE INDUSTRIES & APPLICATIONS

- GENERAL PURPOSE
- FOOD INDUSTRY
- WATER SUPPLY
- AUTOMOTIVE AND ENGINE BUILDING INDUSTRY
- POTABLE WATER SUPPLY
- SHIPBUILDING
- GAS SUPPLY

|             |  |
|-------------|--|
| Composition | Aramid fibres, inorganic fillers, NBR binder.<br>Optional steel wire mesh insert on request. |
| Colour      | Orange   |
| Approvals   | WRAS (Potable Water), BS 7531 Grade Y, EC 1935/2004  |

## TECHNICAL DATA Typical values for a thickness of 1.5 mm

## P-T DIAGRAM

EN 1514-1, Type IBC, PN 40, DIN 28091-2 / 3.8, 1.5 mm

- General suitability - Under common installation practices and chemical compatibility.
- Conditional suitability - Appropriate measures ensure maximum performance for joint design and gasket installation. Technical consultation is recommended.
- Limited suitability - Technical consultation is mandatory.

## σ<sub>BO</sub> DIAGRAM

DIN 28090-1

σ<sub>BO</sub> diagrams represents σ<sub>BO</sub> values for different gasket material thicknesses. These values indicate the maximum in-service compressive pressures which can be applied on the compressed gasket area in-service without destructing damaging the gasket material.

**P-T diagrams** indicate the maximum allowed combination of internal pressure and service temperature which can be applied simultaneously for a given gasket depending on its material type, thickness, size and tightness class. Given the variety of gasket applications and service conditions, these values should only be regarded as guidance for the proper gasket assembly. In general, thinner gaskets exhibit better P-T properties.

## CHEMICAL RESISTANCE CHART

The recommendations made here are intended to be a guideline for the selection of the suitable gasket quality. Because the function and durability of the products depend upon a number of factors, the data may not be used to support any warranty claims.

- + Recommended
- ? Recommendation depends on operating conditions
- Not recommended
