

Glass Fibre Webbing & Ladder Tapes

Construction: Glass Webbing and Ladder Tapes are manufactured from air textured filament 'E' Glass yarns and provide a high volume of entrapped air and consequent good thermal insulation. The basic fibres are lightweight, resilient, incombustible and suitable for operation in applications of up to 550°C

Properties: Glass Webbing and Ladder Tapes are:

- Resistant to oils, most chemicals and solvents.
- Will not rot and is unaffected by bacterial growth.
- Suitable for temperatures up to 550°C.
- Have a medium thermal conductivity.

Typical Application: Hose and Cable Protection, Jointing and Seals.
